DEMARRAGE EN MODE MANUEL FORCE DU CHARGEUR
Cas ou la batterie est trop déchargée pour que le chargeur démarre en mode automatique : Accédez à la carte électronique (avec l'incateur numérique lumineux). Sur cette carte ce trouve un relais transparent, ce relais est alimenté par deux fil de couleur bleu (cosse faston), il faut les désaccoupler et mettre ces deux fils en court circuit (straper). Connecter la batterie au chargeur, la charge doit démarrer malgré des messages d'erreurs au niveau du display. ATTENTION : ce mode de fonctionnement n'est pas préconiser pour une longue utilisation, au bout de 30 mn de recharge , si la tension batterie est revenu au dessus de 27volts merci de remettre le relais en fonctionnement normal. Vous pouvez alors mettre en charge automatique votre batterie.
